Dear Dr. Lederberg:

I want to express our appreciation for your cooperation in connection with publicity for the Federation meeting in Detroit.

The Federation meeting offers the best opportunity of the year to present to the public a picture of the experimental work which underlies medical progress. Only by taking advantage of such opportunities can we hope to eliminate the popular misconceptions of medical research which give rise to the antivivisection movement.

I hope we may enjoy your continued assistance in dispersing the air of mystery which has surrounded medical investigation from the point of view of the lay public.

Sincerely yours,

Ralph A. Rohweder
